CHEMDIST

SCIENCE • ENGINEERING • TECHNOLOGY

Transforming Molecules. Transforming Industries.

Business and Technology Profile

www.chemdistgroup.com

Chemdist Group - Six Business Verticals

Integrated capabilities from core process engineering to next-generation sustainable technologies

Columns, Reactors,
Heat exchangers,
Evaporators,
Mass transfer internals

Turnkey process plants,
Engineering, Procurement,
Project execution

UF, MBR, ETP, ZLD,
MEE/MVR,
Biological treatment

Green chemicals,
Carbon utilization, SAF,
Biomass & Circular technologies

Green hydrogen,
Electrolyzer integration,
Emerging energy systems

Specialty membranes,
Advanced gas separation

Global Presence. Local Execution.

A growing international platform for technology, engineering, manufacturing and customer support

India

Pune: Corporate, R&D, Engineering & Manufacturing

Mundra: Large-scale Fabrication / Modularization

North America region - New Jersey, USA

North American business development, customer interface & customer support

Middle East region - Saudi Arabia

Middle East business development, customer interface & customer support

Europe region - Germany

Europe technology partnerships / Hydrogen & New Energy

East Asia region

South Korea

JNK Global network and international EPC capability

Japan

Japan business development, customer interface & customer support

Global Network

- Technology
- Engineering
- EPC
- Manufacturing
- Regional Customer Support

Overview

Vision

To be a globally trusted EPC and technology partner delivering integrated process solutions for the oil and gas, chemical, pharmaceutical, emerging green energy, and other significant process industries.

Mission

To execute the technology based EPC projects in energy sector considering following parameters

- Safety
- Quality
- Time
- Cost

Serving customers since 1986

590+ projects worldwide

37+ years of global existence. In India since 2010

- Expertise in combustion equipment
- Full spectrum of EPC capabilities
- Trust and Stability

600+ Employees

217K sq. ft. fabrication facility at Adani-SEZ, Mundra and 100K+ in Pune, India.

Safety focus on all our operations

Fully Integrated Group

- Chemdist Group
- JNK Global / JNK India
- Bright Germany

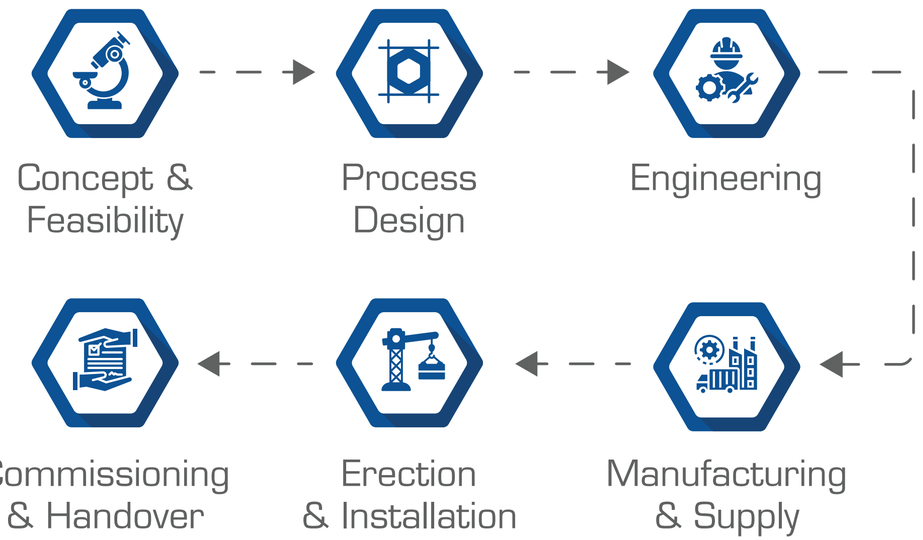

JNK Chemdist - From Innovation to Industrial Scale

Strategic Joint Venture for R&D, Green Technologies & Technology EPC

JNK Chemdist
JNK CHEMDIST TECHNOLOGIES PVT. LTD.

Technology developed with purpose. Engineering built for scale.

Combining Chemdist process innovation with JNK's engineering, project execution and global delivery capability.

1 Technology & R&D

- Process development
- Proprietary knowhow
- Pilot validation

2 Green Technology Commercialization

- Green H_2
- Green chemicals
- Carbon utilization
- SAF
- Circular technologies

3 Technology EPC

- Concept
- Process design
- Engineering
- Procurement
- Fabrication
- Commissioning

4 Global Execution Capability

Chemdist process expertise + JNK engineering, manufacturing and project strength

R&D → **Commercialization** → **Bankable Industrial Plants**

Benefits of JNK Chemdist

- **Accelerated Technology Commercialization**

  Transforming Chemdist's proven IP, process equipment, and process engineering expertise into scalable commercial projects.

- **Global Reach with Innovation & Manufacturing**

  Delivering sustainable solutions for both domestic and international clients.

- **Financial and Execution Power**

  Combining Chemdist's and JNK India's engineering and project execution expertise for global-scale projects. JNK's financial strength enables the execution of **single projects valued up to USD 25 million.**

- **Segment Diversification**

  Capable of providing technology-based products and solutions across multiple process industries, including chemicals, pharma, oil & gas, petrochemicals, fertilizers, and more.

Chemdist Infrastructure

Process equipment fabrication facility in Pune, India.

Total Fabrication Area	Total Manpower
100K+ sq.ft.	**600+**

- Engineering: 183+
- Procurement: 16
- Construction: 95
- Project Management: 27
- Quality & Safety: 32 & 16
- Others: 51

Pune

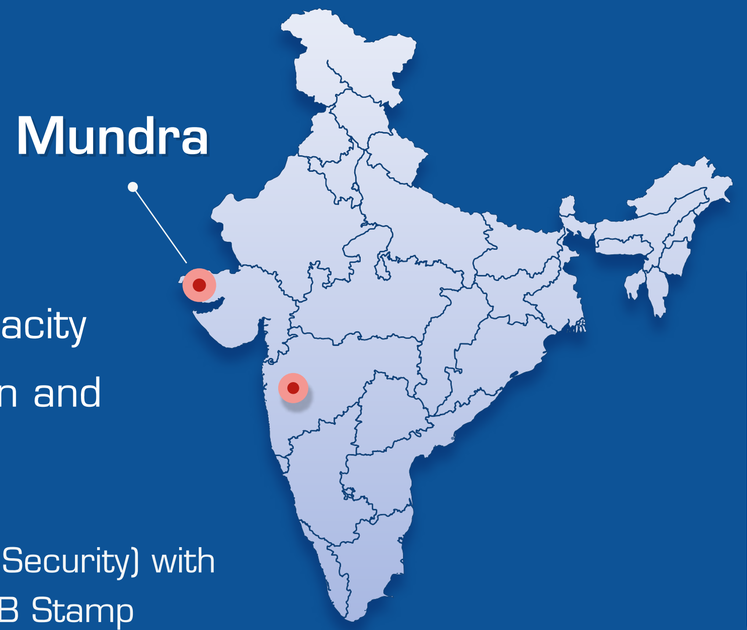

JNK Infrastructure

Near Mundra Port

- Draft: 13 Meters
- Cargo Type: RoRo & LoLo

- Facility Size 217K sq.ft.
- 600/700 MT of fabrication /modularization capacity
- Self-contained infrastructure for export fabrication and modularization

ISO Certified (Quality, Health, Environment & Information Security) with ASME U, S & R Certifications, including ISO 13485:2016 NB Stamp

Full Spectrum of Services

Chemdist provides engineering services, procurement of equipment, materials, and services, as well as construction management and commissioning support for the plant.

- Process and Thermal Design
- Extended Basic Engineering
- Detailed Engineering
- Value Engineering
- Process Equipment, Skids and Plants

- Procurement Services
- Material Management
- Inspection
- Expediting
- Logistics

- Project Management
- Interface Management
- Change Management
- Project Controls, Planning, Scheduling
- Cost Estimation

- Construction Services
- Construction Management
- Constructability and Modularization Studies

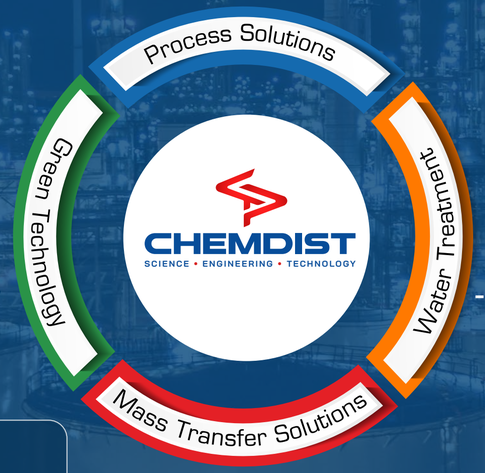

- Start–up Services
- Commissioning
- Start-up Assistance
- Post Start-up Services

We follow these standard: ASME, API, DIN, TEMA, GEP, GMP.

Products & Technologies

Process Technologies

- **Distillation Technology**
- **Heat Transfer Technology**
- **Evaporation Technology**
- **Reaction & Mixing Technology**
- **Liq-Liq Extraction Technology**
- **Chemical Process Technology**
- **Oil & Gas Technology**

Products

- Distillation Columns
- Heat Exchangers
- Condenser
- Reboiler
- Agitators & Reactors
- Pressure Vessel
- Static Mixers
- Thin Film Evaporator
- Wiped Film Evaporator
- Falling Film Evaporator
- Forced Circulation Evaporator
- Strippers
- Scrubbers
- Skids

Water & Wastewater Treatment Technologies

- Effluent Treatment Plant
- Demineralization Plant
- Aerobic & Anaerobic Processes
- Zero Liquid Discharge
- Water Treatment Process
- Condensate Polishing Unit
- Evaporation Technology

Products

- Structured Packings
- Random Packings
- Trays
- Liquid Distributors
- Liquid Collectors
- Packing Supports

Green Technologies

Green Hydrogen Processes

Ethanol to Ethyl Acetate | Ethanol to Acetic Acid | Methanol to Formic Acid
Ammonia Cracking to Green Hydrogen | Glycerol to Polylactic Acid
Biomass to Bio-Oil

Green Plastic

Biomass to Green Plastic (PEF)
Glycerol to Polylactic Acid (PLA) + Green Hydrogen

Sustainable Aviation Fuel

Ethanol to Bio Aviation Fuel + Green Hydrogen

Green Energy

Biomass to Biochar + Bio-Oil + Syngas

Green Chemistry

Ethyl Acetate | Acetic Acid
Formic Acid and Sodium Formate

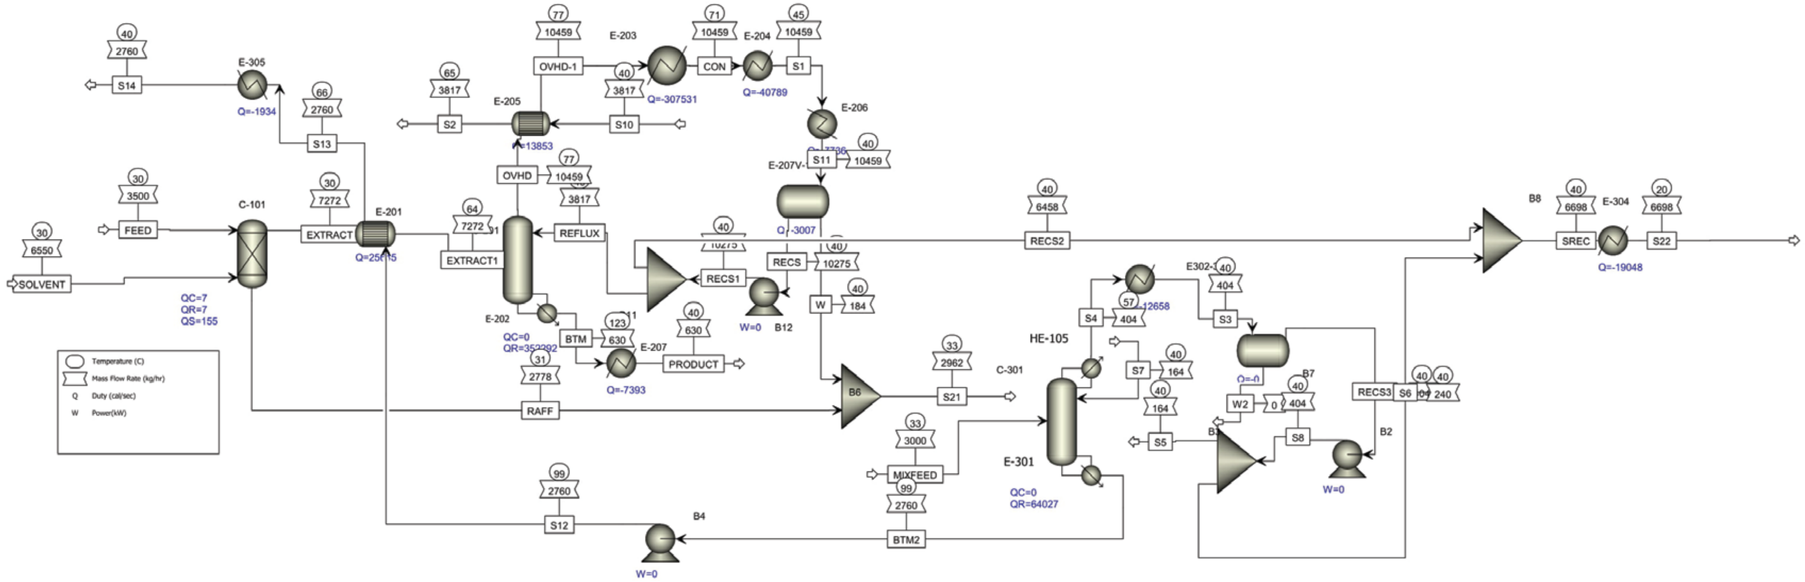

Carbon Capture

Waste CO_2 to Nano Urea
CO_2 to Methanol | CO_2 to DME
CO_2 to SAF + MTO
CO_2 to Syngas

Engineering, Process Simulation and Process Design Software

Sr.No.	PROCESS	MECHANICAL
1	Mixer Settler	PV-Lite
2	ASPEN	CADEM
3	PRO II	Solid Works
4	HTRI	Navisworks
5	FRNC5	Thermal & Process Design

Sr.No.	PROCESS	MECHANICAL
6	STAADPRO	Structural Analysis
7	CAESAR II	Piping Flexibility & Stress Analysis
8	ANSYS	FEM Analysis PDS / PDMS / SP3D – Piping 3D
9	TEKLA	Structural 3D
10	ANSYS	CFD Modelling

Distillation Technology - Turnkey Plants

- Batch Distillation
- Continuous Distillation
- Multipurpose Solvent Recovery Systems
- Azeotropic Distillation
- Extractive Distillation
- Vacuum Distillation
- Divided Wall Column Distillation
- Pilot Distillation Systems

Distillation Columns

Biggest distillation
column delivered
till date with
4.4 m.diameter and
70 m. height

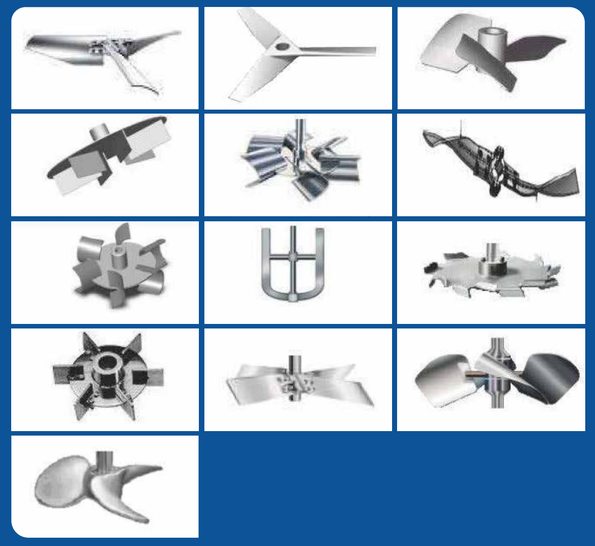

Reaction and Mixing Technology

Agitated Reactors

- **Designed precisely for wide range of operating conditions.**
- **Biggest capacity delivered** - 42 KL
- **Highest designed pressure** - 100 Bar
- **MOC:** SS304, SS304L, SS316, SS316L, SS317L, SS904L, Hastelloy, Duplex Steels, Halar-Coated Steel, Carbon Steel
- **Heating & Cooling Arrangements:** Internal coils, external limpets, and jackets

Reactors

Biocon, Malaysia

3 KL Reactor & 5 KL Day Tanks

42 KL Reactor

5 KL Reactor

20 KL Reactor

42 KL Reactor

Oil & Gas Process Technology

- **Combustion Equipment**

1) Process Fired Heaters 2) Reformers 3) SMR Hydrogen
4) Cracking Furnaces 5) Hot Oil Heaters

- **Condensate Fractionation Plant**

- Condensate are separated according to the boiling point
- Applicable for LPG, Naphtha & Kerosene

- **White Spirit & Mineral Production**

- White Spirit production from Kerosene with C1, C2 and C3 grades

- **Used Oil/lube Oil Refining**

- Use to restore the characteristics of used Oil

- **Pyrolysis Oil Fraction**

- To Produce Light Fuel Oil & Less Residual Char

- **Transformer Oil Reclamation**

- Recycling of Waste Transformer Oil

- **Glycol Dehydration**
- **Blending Units**

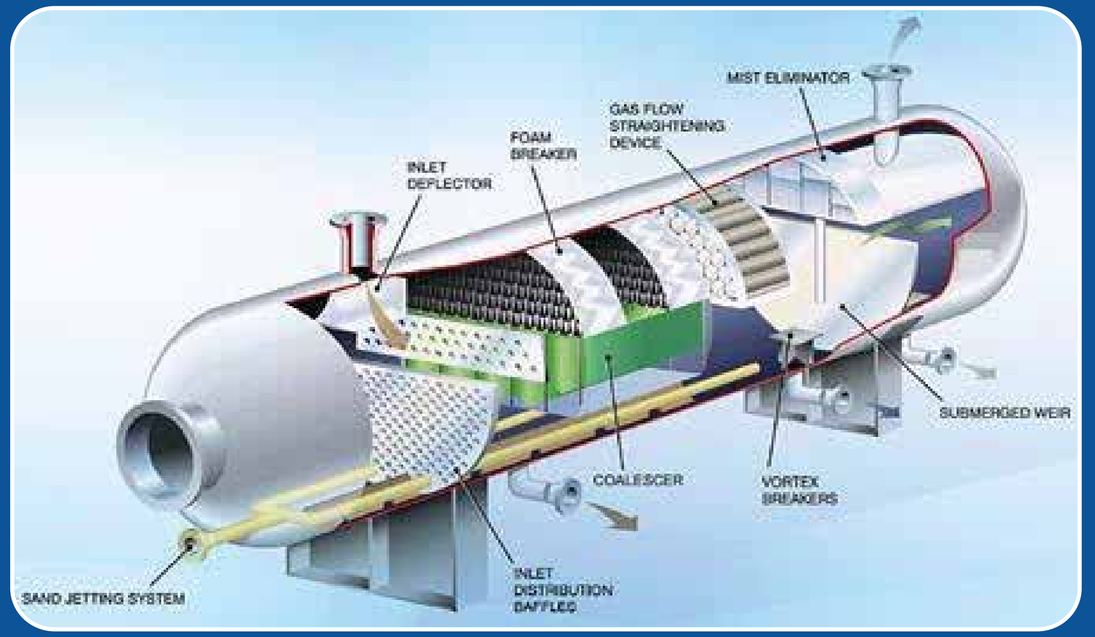

Mass Transfer Internals

- Structured Packings
- Random Packings
- Wire Mesh Packings
- Lab Packings
- Trays
- Liquid Distributor
- Liquid Collector
- Packing Support
- Demisters
- Static Mixers
- Separator Internals (2 & 3 Phase)

Structured Packings

Random Packings

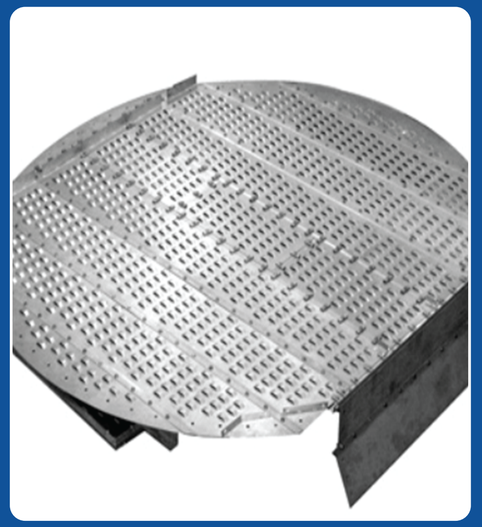

Trays

Internals

Static Mixer

MOC: SS304, SS304L, SS316, SS316L, SS904L, SS317L, Hastelloy C-276, Alloy 20, Duplex, Titanium, 316Ti

Lining: PTFE, FRP, PP, PPFRP, PVC

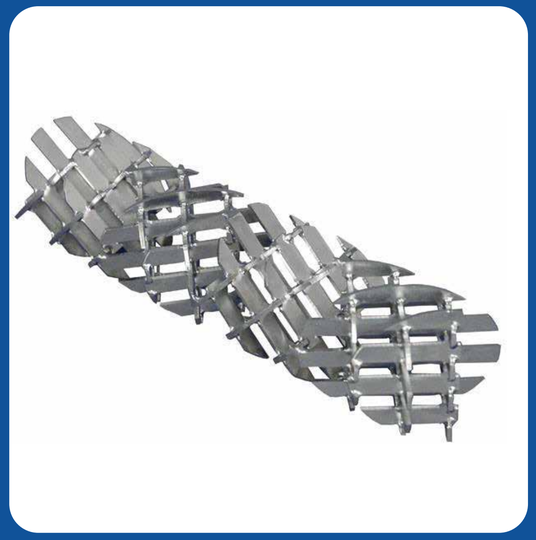

CMV Static Mixer

904L Static Mixer

CMX Static Mixer

PVC Static Mixer

CMH Static Mixer

PTFE Lined Static Mixer

Water & Wastewater Treatment Technologies

- Effluent Treatment Plant
- Demineralization Plant
- Aerobic & Anaerobic Processes
- Evaporation Technology
- Zero Liquid Discharge
- Water Treatment Process
- Condensate Polishing Unit
- Membrane Technology

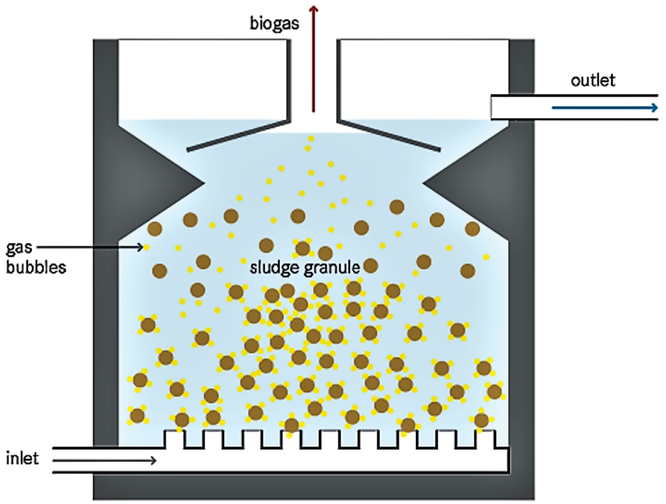

Biological Treatment Technologies

Anaerobic Treatment – UASB / Anaerobic Reactors

- Ideal for high COD wastewater
- Biogas generation for energy recovery
- Low sludge generation
- Reduced operating power

Application

- Distillery
- Food processing
- Pharma
- Chemical industries

Aerobic Treatment Systems

Aeration & Activated Sludge Systems

- Reliable biological oxidation
- Effective BOD & COD reduction

MBBR (Moving Bed Biofilm Reactor)

- Compact footprint
- Handles high organic loads
- Low sludge generation

SBR (Sequencing Batch Reactor)

- Flexible batch operation
- Excellent nutrient removal
- Automated process control

Evaporation Technology

Chemdist designs high-performance evaporator systems for chemical, pharmaceutical, food, and dairy applications. System configuration is optimized based on feed properties, operating conditions, and energy integration, enabling efficient moisture removal, higher solids concentration, and improved steam economy using multi-effect evaporation.

- Forced Circulation Evaporator
- Falling Film Evaporator
- Wiped-Film Evaporator
- Zero Liquid Discharge (ZLD)
- Mechanical Vapour Recompression (MVR) Evaporator
- Agitated Thin Film Evaporator (ATFE)
- Agitated Thin Film Dryer (ATFD)
- Multiple Effect Evaporator (MEE)

Green Hydrogen and CO_2 Conversion

Development pathways for renewable fuels, chemicals and nitrogen fertilisers

Green H_2

Renewable-power electrolysis and bio-ethanol conversion pathways

Hydrogen production, purification and integration with downstream processes

CO_2 to Methanol and DME

Captured CO_2 with hydrogen for methanol synthesis

Methanol purification and downstream dehydration to dimethyl ether

CO_2 to SAF

Captured CO_2 and hydrogen for synthetic aviation fuels

Fuel synthesis through syngas or methanol, with downstream upgrading

CO_2 to Nano-Urea

Captured CO_2 with ammonia for urea synthesis

Separate nano-formulation and product qualification for agricultural use

Chemdist Focus: Process development, Pilot validation, Separation systems and Plant engineering

Biomass to Bio-Oil, Biochar and SAF

Thermochemical conversion of agricultural residues and other suitable biomass

Biomass Feedstock

Feed preparation and pyrolysis produce bio-oil, biochar and process gas.

Bio-Oil | Liquid intermediate for suitable industrial fuel use or further upgrading.

Biochar | Carbon-rich solid for qualified soil, material and other industrial applications.

SAF Pathway | Bio-oil upgrading with hydrogen and fractionation to candidate aviation fuel blendstocks.

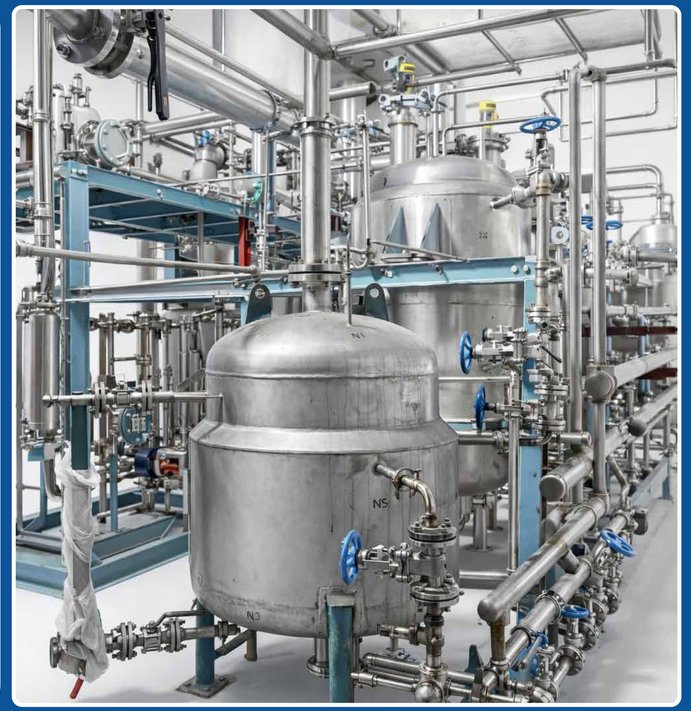

Pyrolysis Equipment

Integration focus: Feed preparation, Reactors, Condensation, Product separation and Heat recovery

In-House Pilot Plant & Lab Facilities

- Distillation Set-Up - **5 L**
- Agitated Thin Film Dryer – **1.5 sq. m.**
- Wiped Film Evaporator – **1.5 sq. m.**
- Green Hydrogen Plant - **50 L**

Snapshots of some Major Projects

Farabi Yanbu Petrochemicals Company, KSA

Plant:
Process Oil & Lube Oils Blending Plant (Brownfield Project)

Capacity: 140 KMTA

Project Description:
Process Oil & Lube Oils Blending Plant – 140 KMTA brownfield expansion project. Basic Engineering Package (BEP) completed by Elixir, Netherlands.

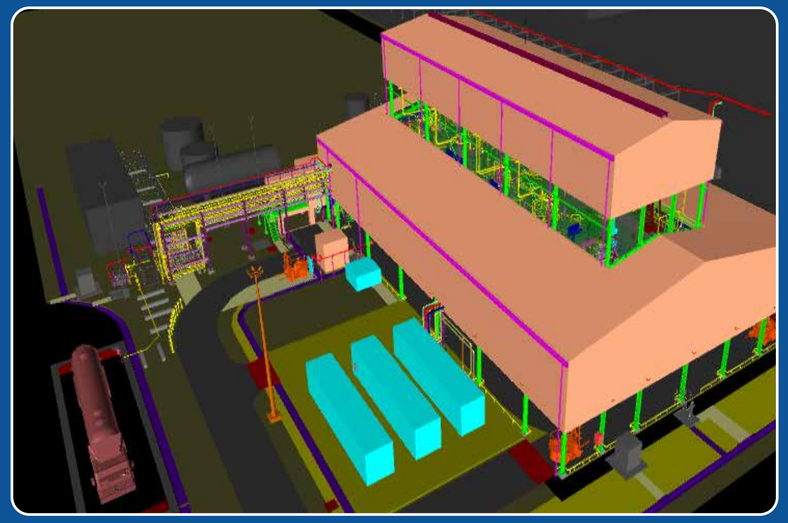

Key Scope:
- Detail Engineering
- Modular Skid Design & Supply
- Preparation of Construction Tender for Site Execution
- Project Management & Site Supervision

Scope:
Engineering, Procurement, Fabrication and Construction

Year of Award: 2019
Year of Completion: 2022

FARABI PETROCHEMICALS

23.9935° N
38.25219° E

Global Company For Chemical Industries (Addar Group), KSA

Plant:
Multipurpose Stage-1 Reaction Facility

Capacity: 6,800 TPA

Project Description:
Multipurpose Stage-1 Reaction Facility comprising MPP-Stage-1 batch process with semi-automatic plant operations. Reaction and blending are the basic processes involved in the facility.

Key Scope:
- Engineering
- Procurement
- Fabrication
- Site Construction

Year of Award: 2018
Year of Completion: 2019

ADDAR Chemicals كيماويات

27.052748° N
49.545748° E

TACO Chemicals, Turkey

Plant:
Ethyl Acetate Plant

Capacity: 100 KLPD

Project Description:
100 KLPD Ethyl Acetate Plant executed on EPC basis. The plant achieved Ethyl Acetate (EA) purity of 99.95%.

Scope:
- Detailed Engineering
- Procurement
- Fabrication
- Supply
- Commissioning
- Project Management
- Site Supervision

Year of Award: 2017
Year of Completion: 2018

TACO CHEMICALS

36° 48' 27.7" N
34° 39' 37.8" E

Green Energy Chemicals, Turkey

Plant:
Corn Syrup Based Distillery

Capacity: 50 KLD

Project Description:
50 KLD Corn Syrup Based Distillery. The project included preparation of Basic Engineering Package (BEP) and Detailed Engineering Package (DEP), along with supply of equipment, structures, piping, and supervision for site construction and commissioning.

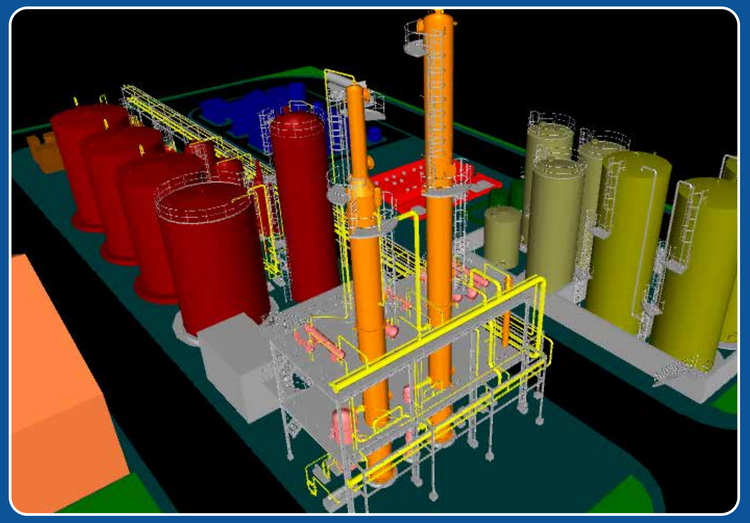

Scope:
- Engineering
- Procurement
- Fabrication
- Construction
- Commissioning

Year of Award: 2022
Year of Completion: 2023

Green Energy Chemicals

37° 27’ 35.2” N
35° 46’ 11.0” E

NALCO Saudi Company Limited, Dammam, KSA

Plant:
Reactor Engineering Project

Capacity: 20 KLPD

Project Description:
Reactor Engineering Project with 20 KL reactor capacity, including engineering, fabrication, and supply of equipment, utilities, piping, and electrical & instrumentation systems, along with erection and supervision during commissioning.

Scope:
- Engineering
- Procurement
- Fabrication
- Construction
- Commissioning

Year of Award: 2024
Year of Completion: Under Execution

Biocon Limited, Bangalore, India

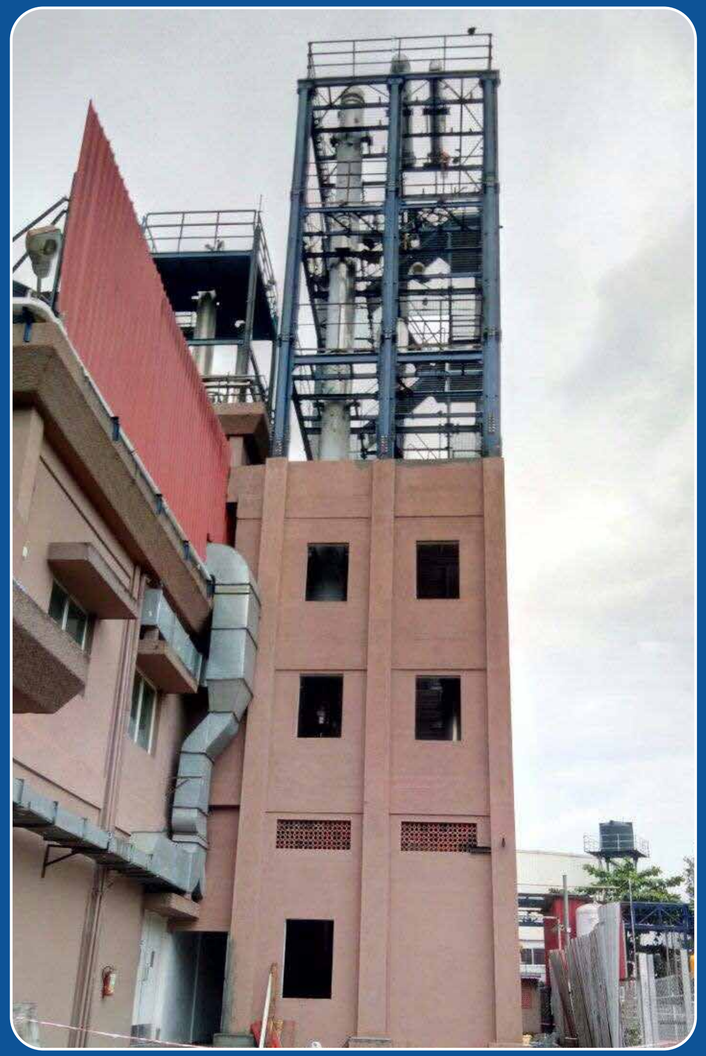

Plant:
Batch Distillation System for Multipurpose Solvent Recovery

Capacity: 20 KL

Project Description:
Engineering, procurement, and supply of a batch distillation system for multipurpose solvent recovery, including installation of a critical three-floor structure at a constrained location, instrumentation with automation support, and successful commissioning achieving the desired purity and product rate.

Scope:
- Engineering
- Procurement
- Fabrication
- Construction
- Commissioning

Year of Award: 2015
Year of Completion: 2018

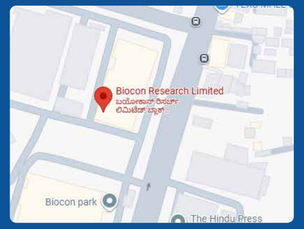

Biocon

12° 48’ 26.9” N

Reformer Package for Assam Petrochemicals Ltd.

Reformer Capacity: 69.8 Gcal/hr

Plant Capacity: 500 TPD Methanol and
200 TPD Formaldehyde

Licensor: Haldor Topsoe

Radiant Tube MOC: 25Cr 35NiNbTi

Number of Catalyst Tubes: 138 (1 row)

Number of Burners: 180 (30 × 6 rows), side wall mounted

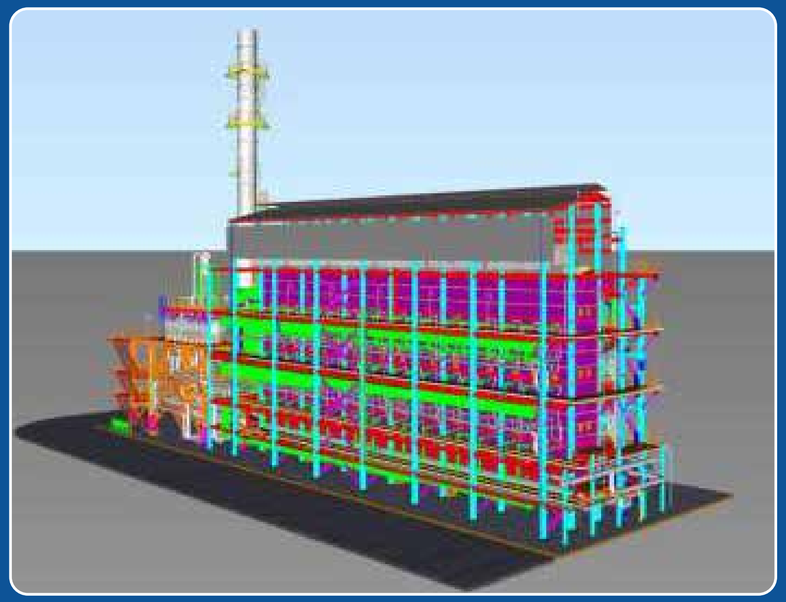

Scope: Engineering, procurement, fabrication, supply, construction, and commissioning

Overall Contract Value: USD 17 million

Year of Completion: 2022

Assam, India
27.1869° N,
95.3706°E

Reformer Package for HPCL Rajasthan Refineries Ltd.

Reformer Capacity: 46.7 Gcal/hr

Plant: Hydrogen Generation Unit (55,000 MTPA)

Licensor: Technip

Radiant Tube MOC: 25Cr 35NiNb Micro-alloy

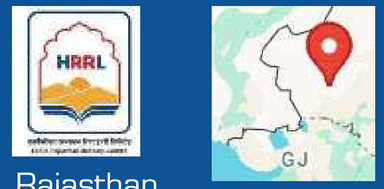

Number of Catalyst Tubes: 152 (38 × 4 rows)

Number of Burners: 55 (11 × 5 rows), top-mounted

Scope: Engineering, procurement, fabrication

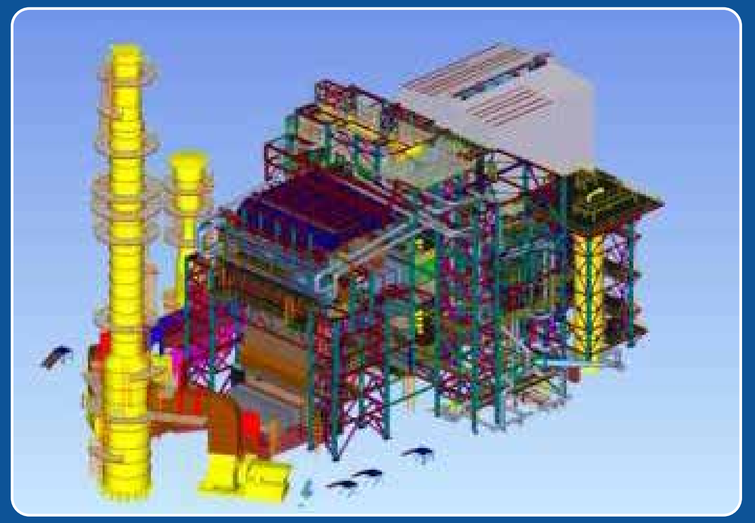

Overall Contract Value: USD 13 million

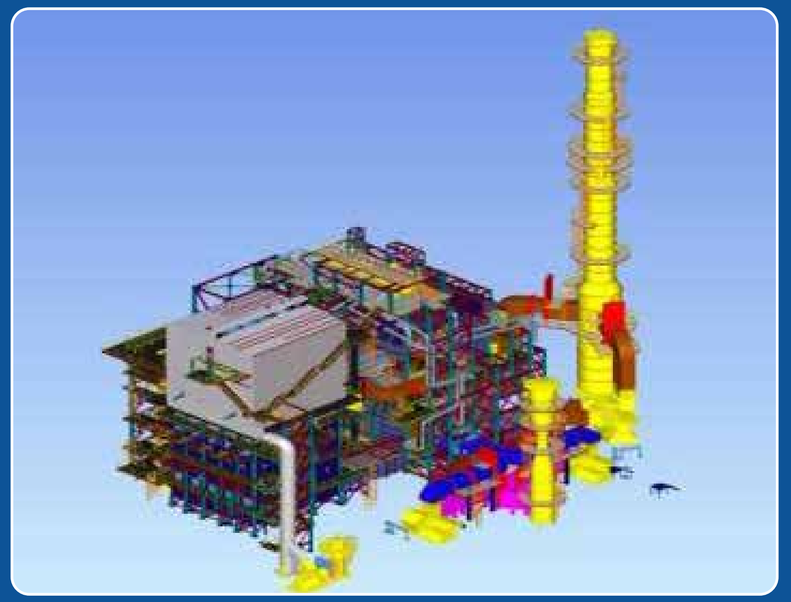

Year of Completion: 2022

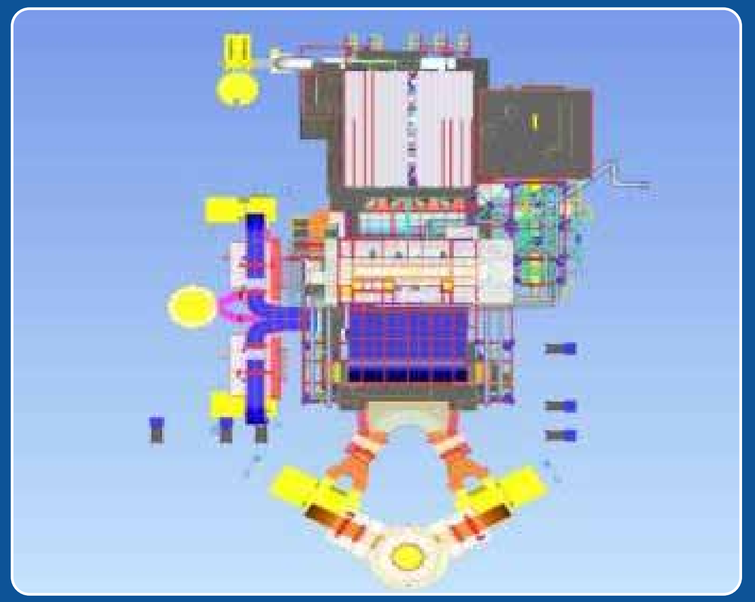

Rajasthan, India
